

You are in a fruit fly outbreak area

Fruit and vegetables at risk from fruit fly cannot be moved around.

At risk

fruit and vegetables include:

- Pome fruits (apples, pears, quinces)
- Tropical fruits (bananas, mangoes)
- Flowering plant fruits (loquats, figs, feijoas)
- Stone fruits (apricots, peaches, nectarines, plums, cherries)
- Citrus (oranges, lemons, grapefruit, cumquats)
- Fruiting vegetables (tomatoes, capsicums, chillies, eggplant, tamarillo)

Unrestricted

fruit and vegetables include:

- Cucurbits (cucumber, pumpkin, squash, zucchini)
- Leafy vegetables (lettuce, cabbage, cauliflower, broccoli, kale, celery, spinach, silverbeet)
- Root vegetables (beetroot, turnip, parsnip, carrot, potato, onion, garlic)
- Peas, beans
- Herbs

Use a green kerbside bin, or seal in a plastic bag and call the Fruit Fly Hotline - do not compost or bury.

Find out what you need to do - visit fruitfly.sa.gov.au or call the Fruit Fly Hotline on **1300 666 010**
